

Sachse Amateur Radio Association Simplex Net Script  
Version: 6.0 March 1, 2020

Good evening and welcome to the “*Ham Radio in Sachse*” Simplex Net. My name is (*name, call sign*), and I will be your net control this evening. This net is heard every 2<sup>nd</sup> and 4<sup>th</sup> Tuesday evening at 7:30 pm on frequency 146.40 Simplex. Therefore, there is no need for an offset or PL tone. All licensed amateurs are invited and encouraged to participate, whether you are a club member or guest. The purpose of this net is to practice scenarios that might cause communication difficulties. This is a Directed Net. Please do not transmit unless directed to do so by Net Control. As I recognize check-ins, please make a note of check-ins you did not hear, and check-ins that were not clear. If at any time, you have an emergency to report, break in by saying “Priority” or “Emergency” followed by your call sign and the net will stand by. An emergency is defined as the imminent threat to life or property. **Is there any emergency, priority or time sensitive traffic at this time? *Pause***

**Check-Ins:**

We will begin by taking check-ins, three at a time. If you would like to check into this net, please give your call sign phonetically, your name and repeat your Call Sign alphanumerically slowly, so Net Control can write it down. I will take three check-ins now.

*(write down and read back call signs of check ins).* (Remember: There is no need for Echo Link on simplex, since that is a function of the repeater).

When there are no more check-ins, ask if anyone was not able to hear all the check-ins.

You may have to pick a relay person for the night.

If you had to pick a relay person or persons, then remember to stop after each conversation and have the relay person pass that information on.

**Club Announcements: *Now is a good time for Net Control to ID.***

Our first topic will be announcements from club officers. Any club officer on the net with an announcement, please give your call sign now.

**Member & General Comments: *Now is a good time for Net Control to ID.***

Our next topic is member & general comments. Any member of the Sachse Amateur Radio Association, or anyone else on this net, who would like to make a comment, please give your call sign now.

**Special scenario; *Now is a good time for Net Control to ID.***

*(If there is a special scenario for practice, explain the scenario.)*

The scenario for tonight is ...

*(If there isn't a special scenario, ask for suggestions of possible scenarios to practice on future simplex nets.)*

If anyone has a possible scenario we can practice in the future, please give your call sign now.

**Signal Reports: *Now is a good time for Net Control to ID.***

I will ask each of you for a signal report on the participants, including net control. For example; how did net control sound. Was net control loud and clear, or was net control low and unreadable. Please use the plain language radio checks provided on the Sachse Radio web page. I will now go down the list of check-ins so everyone can give their response.  
*(Net control starts.)*

**Participants information: *Now is a good time for Net Control to ID.***

Now I will ask each check-in to report their general location, stationary or mobile, power level, and any other information you think that is affecting your broadcast. For example; Wylie, stationary, 50 w, I am at a very low elevation. This will help us learn the areas where problems with communication will probably occur.

**Late Check-Ins: *Now is a good time for Net Control to ID.***

Before we end this Net, I would like to take late check-ins. If there are any late check-ins, please give your call sign and name slowly and clearly. *(write down and read back each call sign).*

When there are no more late check-ins, ask each new check-in for their information; location, etc.

Then ask previous check-ins who could not hear the late check-ins, or heard the late check-ins but were low and unreadable.

Remind the late check-ins to make note of previous check-ins they can not hear or are low and unreadable.

**Last Call:**

This is now the last call for any station that might have any comments? Please give your call sign.

**Wrap-Up: *Now is a good time for Net Control to ID.***

This concludes the “Ham Radio in Sachse” Simplex Net. If you would like more information about the Sachse Amateur Radio Association, please visit our web site at [www.sachseradio.org](http://www.sachseradio.org). This is (*call sign*) and we now return this frequency to its normal use.
